The Department of Health Services Policy and Management (HSPM), Arnold School of Public Health, University of South Carolina, Columbia, SC seeks qualified candidates for a tenure-track faculty position at the rank of Assistant or Associate Professor in Health Information Technology. This new faculty member will contribute to the Department's degree programs by offering courses on applications of technology in the administration of healthcare delivery and working collaboratively with faculty within and outside the School of Public Health to develop a competitively funded research agenda in the health information technology area.

The Arnold School of Public Health is fully accredited by the Council on Education for Public Health (CEPH). The Department is a full Graduate Member of the Association of University Programs in Health Administration (AUPHA). The Department offers a Master of Public Health degree, a Master of Health Administration degree (accredited by the Commission on Healthcare Management Education), a Master of Health Information Technology degree (in collaboration with the College of Hospitality, Retail and Sports Management) as well as PhD and Doctor of Public Health degrees in Health Services Policy and Management. Among the external health IT resources and opportunities available, the department is affiliated with Health Sciences of South Carolina which has a large clinical database and connections with the MidSouth CDRN (PCORnet) and the Carolina Collaborative.

**Qualifications:** Earned doctoral degree in Health Services/Administration or Health Information Systems-related field, a promising record of original research on health information technology issues, a commitment to quality teaching, and demonstrated ability to work with a multi-disciplinary team are required. Preference will be given to candidates with evidence of scholarly or practical experience with using information systems in health services quality improvement; care delivery and operations decision-making; and similar applications. Knowledge of or experience with national-level health information technology-related policy is a plus as is experience in collegiate-level teaching. Evidence or promise to obtain external funding is required.

**Responsibilities:** Develop and teach courses related to information systems and its application in health care administration, initiate and develop funded research program and collaborate with colleagues on research activities related to health information management. Deepen linkages with local healthcare organizations for graduate student training and research purposes. Advise and mentor students and fellows. Perform service to the University, profession, and the community.

**Salary:** Commensurate with experience.

**How to apply:** A letter of application, curriculum vita, and electronic contact information for three references should be sent by e-mail, with “HSPM HIT Faculty Search” in the subject line, to HSPMHIT@mailbox.sc.edu. Early applications are encouraged. Review of the applications will begin immediately.

The University of South Carolina is an affirmative action, equal opportunity institution. Minorities and women are encouraged to apply, our many minority and female students value role models. The University of South Carolina has a generous family leave policy and is responsive to the needs of dual career couples.
