**Behavioral-Biomedical Interface Program (BBIP)**
**Supplemental Application**

Applicant: _____ Date: _____

Intended doctoral program (check one):

- ☐ Clinical-Community Psychology
- ☐ Epidemiology
- ☐ Exercise Science
- ☐ Experimental Psychology

The BBIP provides intensive biological and biomedical research training which is integrated into the behavioral science training of doctoral students in Epidemiology, Exercise Science, and Psychology. This NIH-supported interdisciplinary (T32) research training program trains prepares students for scientific careers. Please complete the following three questions (take as much space as you need).

1. What are your reasons for applying to the BBIP?

2. Please describe your career goals and the steps for achieving those goals.

3. Please describe aspects of your background which you believe have helped to prepare you for the biological and biomedical training that BBIP will add to your behavioral science doctoral training.
