Strategic Planning Work Session
 This session will provide an opportunity for participants to contribute to the development of a strategic plan that addresses cervical cancer. Participants will dialogue and share recommendations regarding priorities and action steps that should be taken in South Carolina. There will be designated rooms and locations with clinical and community titles. Participants will be asked to join the table that best meets their interests and needs, and

each table will be responsible for prioritizing two action steps that could be employed to address cervical cancer. In addition, each group must develop a list of resources that already exist that might address cervical cancer in this state.

- To whom do we send brochures and market the event? How can we ensure diverse participation?

IV Special Edition of the Journal of the SC Medical Association (*Heather Brandt*)

- a. Article topics/titles and authors
- b. Submit proposal to editorial board
- c. Proposed publication in January 2009
